

DMN 1.1 Top 10 List

Gary Hallmark
BBC Nov 5, 2015

1. combine dmnn.xsd and dmnn3.xsd, fix it, test it, and use it for Ch 11 example
2. align metamodel, XML schema, notation, concepts, semantics
3. define metamodel, notation, and semantics for **decision service**
4. in MM and XSD, replace many references with composition, especially in decision table
5. use names for reference instead of IDs in many cases, remove redundant references
6. remove Completeness and Consistency indicators from model and notation
7. disallow nested decision tables
8. add text annotations, simplified from BPMN
9. add extensibility, simplified from BPMN
10. add UnaryTests (e.g. >0) to ItemDefinition and DecisionTable metamodel
